Capability Information

Main Business Activities

Airlie Earthworks (AE) began trading in 2010 as a result of owner Ben Mizzi, a highly experience operator recognising an opportunity within the region for this service. With Ben operating their five tonne excavator, and wife Trudy taking care of administration they have successfully expanded the fleet to include five excavators and two tipper crane trucks.

Airlie Earthworks provides high quality earthmoving services to industrial, commercial and residential clients throughout the Whitsunday and Mackay regions, and west throughout the Bowen Basin.

Equipped to complete a range of earthworks and associated works, including house pads, commercial works, bitumen, car parks, set up for landscaping and kerbing for clients. Airlie Earthworks offers highly skilled and experience operators or dry hire machines if preferred.

Our business is built on customer service, from the negotiations stage through to completion. All our operators are fully qualified, hold certificates of competency and are regularly participating in ongoing safety skills and training.

Airlie Earthworks key focus is safety, efficiency and customer service.

We look forward to assisting you with your project.

Preferred Business

Airlie Earthworks has a wide range of experience and can complete any job requested pending availability. Our services have in the past included, but are not limited to:

- Major and minor road upgrades
- Rock walls
- Culvert works
- House pads
- Land clearing
- Subdivisions
- Bridge works

Whilst the majority of our business to date has been contracting Tier 1 and Tier 2 civil contractors who hold the larger agreement, all sized jobs are reviewed, considered and accommodated where possible.

Products and Services

Airlie Earthworks services include:

- Earthmoving equipment
- Labour hire

All aspects of the job are covered in detail during the scope of works process, ensuring all requirements are completed within deadlines. Our site managers ensure constant contact with site supervisors to ensure targets are being met if not exceeded throughout the life of the job.

Specialised Capabilities

Ben Mizzi, as the signature operator has completed a range of works within his time including various challenges, such as:

- Operating a large excavator floating on a barge during construction of the Forgan Bridge, Mackay
- Strategic placement of large boulders to be visually appealing within retaining walls

Capacity

Airlie Earthworks capacity is based on the ability to jobs within the requirements of deadlines, pending machine availability due to previous commitments. We are not bound by geographical locations, and can mobilise our equipment to accommodate requests from outside our primary location.

All jobs are viewed as crucial, with only the highest quality service and care taken to ensure expected outcomes are accomplished for the client.

Area of Operation or Supply

Our head office is in Airlie Beach, however as mentioned our operations extend outside our primary location, south to Mackay, west to the Bowen Basin, north to Townsville and surrounds. Transport cost is a factor, however if it works for the client we will deliver.

Track Record

Airlie Earthworks has a proven track record of experience at all levels, domestic, commercial and industrial. Examples include:

- Forgan Bridge upgrade, \$157M, Golding Contractors
- Local area road upgrades, \$1.6M, Golding Contractors
- Peak Downs Highway upgrade, \$80M, Golding Contractors

Year Established

Ben Mizzi recognised an opportunity to supply earthworks services to the Whitsunday and Bowen Basin region in 2010. Ben and wife Trudy created Airlie Earthworks soon after, and have been growing as a business ever since. The fleet has expanded over this time from the outset of one excavator to now five excavators and two tipper crane trucks along with a team of operational staff.

Ben and Trudy have a commitment to growth of the business and are well entrenched in the region and enjoy employing a number of residents in the area. Ben personally screens and appoints new staff to ensure they met all business requirements, including formal operational certification, as well as qualities both Trudy and Ben would like their clients to experience when working with the business. These include high levels of professionalism, being honest, productivity and as cost effective as possible, at all times. This mix has lead to the long term commitment and excellent work ethic instilled in our staff, shared within our team, and experienced by our clients.

Airlie Earthworks has a commitment to offer professional service at all levels and maintain the highest quality of personalised service for all clients as the business grows into the future

Responsiveness

Whilst Airlie Earthworks holds a number of contracts at any given time, should a situation arise where equipment and labour is needed urgently, all resources will be reviewed and prioritised to respond quickly and assist the client where possible.
