

AIRLIE EARTHWORKS

2023
**CAPABILITY
STATEMENT**

COMPANY OVERVIEW

Airlie Earthworks has built a powerful reputation far beyond our North Queensland base for high quality earthmoving work. We provide top-shelf equipment and wet-hire operators to civil contractors on key infrastructure projects across main roads, rail, Defence, bridges, drainage, pipework and commercial site fillings/excavations.

Regardless of the scale or challenge of projects we commit to locally and nationally, the highly skilled, hard-working team at Airlie Earthworks delivers timely and cost-effective service across far more than just ground-level earthworks. Our team moves heaven and earth to deliver outstanding service every time.

Since 2010, we have excelled in the process of earthmoving: our services include earthworks (detailed and bulk), house pads, commercial works and car parks construction. We are set up for landscaping, kerbing, roadworks, drainage, sewer, cut-to-fill and civil works. All of this is backed by our commitment to excellence, cost-effective solutions and client satisfaction.

Efficiency, reliability and quality backed by a commitment to safety and strong client relationships — Airlie Earthworks digs deep to deliver the highest standard of work and customer satisfaction.

OUR PURPOSE

Customer service is paramount to us. We are with our clients throughout every project, from advice to ongoing consultation and completion.

At Airlie Earthworks, we genuinely value our staff and the extensive skills, commitment and level of productivity they bring to the job. We foster a positive work environment which translates to high performance and pride in project outcomes.

We place strong emphasis on supporting local communities wherever possible, employing skilled operators from the areas where projects are based.

Honesty, integrity and professionalism ensures clients receive efficiency and commitment regardless of project size or challenge.

When clients and contractors connect to Airlie Earthworks, they are guaranteed quality service backed by exceptional operations personnel and the latest earthworks equipment.

OUR SERVICES

Airlie Earthworks provides top-shelf earthmoving and excavating for major projects such as road upgrades and widening, civil construction, commercial site digging and filling along with sewerage and stormwater drainage and pipework.

Our highly skilled operators are complemented by an extensive range of well-maintained, up-to-date equipment, including tipper truck combinations and excavators, (with attachments such as compaction wheel, tilting mud, GP and trenching buckets, ripper, hammer and spreader bar),

We pride ourselves on full consultation and professionalism from start to finish, with regular communication and consultation with site managers and supervisors to ensure project targets are met on time and within budget.

ROADS

Our team has laid the groundwork for major roads projects in Queensland, including widening, flood restoration, pavement rehabilitation on upgrades of the Bruce Highway (Ayr); Kennedy Highway (Ravenshoe) and around Townsville.

RAIL

Airlie Earthworks have proven our proficiency in major rail through our involvement with the Inland Rail construction, contracted by Trans4m Rail for plant hire in the 171km, \$693m section between Narrabri and North Star.

CONSTRUCTION

Our civil infrastructure expertise has backed integral excavations for roads, drainage, trenching, re-sheeting, bridge work, subsoil drainage and top soiling at the likes of Shoalwater Bay Training Facility, Bannerton Solar Farm and Sunshine Coast Airport.

INDUSTRIES WE SERVE

At Airlie Earthworks, we provide high quality, reliable earthmoving expertise and skilled operators, catering to an increasingly diverse range of industries throughout Queensland and nationally.

ACCREDITATION AND EXPERTISE

We are proud of the calibre of our loyal, hard-working, experienced and highly skilled team at Airlie Earthworks.

Fully qualified and certified for all your earthwork and excavation needs, our operators are locally sourced wherever possible. We have the highest respect for our staff, with that support translating to a commitment to achieve elite results for every project.

We are committed to not only quality but the safety of our team and all involved in projects, backed by ongoing training to remain compliant with all industry requirements.

OUR CLIENTS

Airlie Earthworks continues to consolidate our powerful reputation for consistently high standards, efficiency and reliability across large multi-million dollar developments throughout Queensland, Victoria, NSW and beyond.

We have a proven track record of quality partnerships and contracts, teaming with major industry forces such as **BMD, Trans4m Rail, John Holland, Golding Contractors, Decmil, Golding OHL Joint Venture, CMC and UGL Limited.**

Our earthworks and excavating proficiency have been used as part of the Inland Rail construction (Narrabri to North Star, general plant hire), Sunshine Coast Airport runway expansion (subsoil drainage installation, topsoil open cut drains), Shoalwater Bay Training Facility (roads, drainage and re-sheeting), Bannerton Solar Farm (Victoria, trenching), Forgan Bridge (Mackay) and major highway and roadwork in central and Northern Queensland.
